Education

National Institute of Technology, Hamirpur

2024 – 2028

Bachelor of Technology in Computer Science and Engineering

Prince Academy of Higher Education, Sikar, CBSE

2024

12th

Work Experience

Frontend Developer: NIT Hamirpur September 2025 – Present

NextJS, TypeScript, TailwindCSS

- Developing a production-scale government educational platform in collaboration with faculty, designers, and backend teams.
- Leading frontend development using Next.js (App Router), TypeScript, and Tailwind CSS, building modular, reusable, and scalable components.
- Improved page load performance by 30% through layout optimization, asset compression, and framework-level performance best practices.
- Participated in code reviews, debugging, and iterative feature development to maintain production stability.

Skills

- **Programming Languages:** C++, Python, JavaScript
- **Core Concepts:** Data Structures and Algorithms, Object-Oriented Programming
- **Full Stack:** UI/UX (Figma), Frontend (HTML, CSS, Tailwind, Bootstrap, JavaScript, TypeScript, ReactJS, NextJS), Backend (NodeJS, ExpressJS)
- **Tools and Technologies:** MongoDB, Git, Linux, VS Code, Chrome DevTools
- **Soft Skills:** Collaboration, Accountability, Communication, Adaptability, Problem Solving

Projects

HimadriAllInOne: Hostel Management Platform 🐙 🔗

MERN

- Architected a modular hostel management system handling mess attendance, meal availability, billing summaries, and student activity tracking.
- Designed dashboards supporting 300+ users, focusing on data consistency, performance, and scalability.
- Increased administrative efficiency by 35% by consolidating multiple hostel utilities into a single integrated system.

BridgeTheGap [Developed during Electrothon 7.0] 🐙

Python, ReactJS

- Developed a real-time Sign Language to Speech Converter aimed at improving communication accessibility for the hearing- and speech-impaired.
- Built a gesture recognition pipeline using OpenCV and MediaPipe, tracking 21-point hand landmarks for responsive real-time interpretation.
- Debugged gesture recognition edge cases and optimized inference for smoother performance.

SamvaadAI – AI Voice-Based Interview Agent 🐙 🔗

MERN

- Developed the frontend for an AI-powered voice interview agent that conducts resume-based interviews and evaluates responses
- Focused on usability, responsiveness, optimization and building reusable UI with React Bits components.
- Resolved frontend issues using DevTools to ensure smooth flow, stable integration, and consistent UX.

Achievements

- Selected for a competitive institute-level development team, contributing to a long-term production engineering project.
- Represented NIT Hamirpur at **Smart India Hackathon 2025**.
- Actively involved in technical societies, collaborating across teams while balancing academics and engineering work.

Leadership and Volunteering Experience

- Volunteered in planning and on-ground execution of Hack 5.0, coordinating participants, logistics, and technical flow — **CSEC, NIT Hamirpur**.
- Spearheaded a 4-member team to develop a real-time Sign Language to Speech system during Electrothon 7.0 — **NIT Hamirpur**.
